Sewer: Sewer charges shall be billed in advance of the service and on a quarterly basis to all existing users on record with the department. The billing periods are established to reflect the quarterly recovery costs, and the advanced billing is generally on June 25, September 25, December 26, and March 25 of each year. At its discretion, the department may vary these billing dates.

Users who are not of record during the beginning of the normal quarterly billing period defined in the paragraph above, will be billed on a prorated level of service after any of the following, whichever occurs first, and to the end of the quarterly billing period, less fifteen (15) days for processing and notification allowance:

- The department's receipt of a certificate of occupancy from Building Department;
- After the residence or location has become occupied; or
- When water service is established to the location by the Virgin Valley Water District.

A user receives sewer services at all times during which there is any billing unit or ERU upon the user's parcel of land which may contribute to the sewer system. Each user is responsible for all charges applicable to the user's land, whether for connection fee charges or annual sewer charges. It is the responsibility of the user to inform the district of any changes in ownership, billing address, installation or removal, or any billing units or ERUs within thirty (30) calendar days after each such change. The user may be held liable for unpaid charges. Removal of any billing unit or ERU must be to the satisfaction of the department. (Ord. 51, 6-19-1989, eff. 7-1-1989; amd. Ord. 219, 4-27-1999, eff. 5-20-1999).

Garbage: The City will provide the necessary containers to be used in connection with the ninety (90) gallon automated collection system for city residents and others living in the city participating in said system. The City will collect, or cause to be collected, an annual rental fee for the use of each container. All applicable fees will be billed and collected quarterly. If a container is lost or destroyed, it will be the responsibility of the resident to replace the container. The purchase price of a replacement container will be prorated after the first year of service at the rate of a four dollar (\$4.00) reduction per year. The containers provided for rental by the City are the property of the City.

Collecting, hauling and disposing of garbage, rubbish, dirt and dead animals from single-family residences and multiple dwellings participating in the ninety (90) gallon automated system is mandatory by no other than the contractor with whom the city has contracted to haul the same, except as provided in this code. (Ord. 167, 5-20-1996).
